

CELL PROLIFERATION FACTOR Fwa267

ABSTRACT

The application disclosed a cell proliferation factor-Fwa267 polypeptide and the polynucleotide encoding the polypeptide and a process for producing the polypeptide by recombinant method, the antibody and antagonist against the polypeptide and a composition comprising Fwa267 polypeptide and its usage in the treatment of angiocardopathy and cancer are also disclosed. The application further disclosed a diagnostic method by detecting the mutation in the nucleic acid sequence encoding Fwa 267 or the amount of Fwa267 in the sample or the changes of autoantibody of Fwa267 gene product. The cell proliferation factor of the present application is of human resource.
